Course Description: Agile Project Management officially began in 2001 and has since become a popular project management approach. This course will examine how to energize, empower, and enable project teams to deliver customer value within a strong Agile framework. Participants will examine the value and process for actively involving the customer in delivering features and functionality throughout the project. This course will explore actions that reinforce the ability to respond to a changing project environment while focusing on delivering high customer value in every project.

Method of teaching: Students will learn tips, techniques, and processes through webinars, which can be accessed 24/7 and completed at their own pace. Remember, though, that you must complete the course within 60 days.

Course Objectives:

Objective 1: Define Agile Project Management and the Agile Manifesto

- Compare why traditional projects struggle and fail
- Discuss criteria for when to use the Agile methodology
- Discuss when and how to use the hybrid approach to utilize traditional Project Management and Agile Project Management
- Identify the success factors of Agile Project Management
- Identify the principles of Agile Project Management
- Compare predictive planning and adaptive planning
- Discuss the rights and roles of the Agile business case

Objective 2: Define user stories, story mapping, Kanban boards, and burndown charts

- Examine the usage of the product vision box and the product backlog
- Discuss the characteristics of a time box

(Continued on next page)
